Subject: L-Drive performance degradation- PLEASE READ

Hello all!

Just a quick notice that as part of the ORD NERL lab closure, we are completing our process of shutting down the datacenter here in Las Vegas on Friday, July 27th. This will impact the access speed you normally have to the L drive, as your files will have been moved to Cincinnati. Due to the remote location from LV you may see a slight delay in saving and retrieving files to that location. Large files could take a considerable amount of time depending on the file size. You can of course utilize your OneDrive same as before as that will not change. There should not be any other systems affected with the shutdown. If you have any questions please let me know. I will be in transit from RTP back to LV the remainder of today but will be in the office tomorrow to assist if needed. Thank you for your patience and understanding.
